RESOLUTION NO.

RESOLUTION DIRECTING THE COUNTY MANAGER TO IMPLEMENT THE RECOMMENDATIONS OF THE MIAMI-COUNTY RESOURCE DADE CONSERVATION COMMITTEE (MDRCC); ESTABLISHING POLICIES AND GUIDELINES TO FURTHER WASTE REDUCTION, RECYCLING, AND ENVIRONMENTALLY PREFERABLE PURCHASING (EPP) ACTIVITIES IN COUNTY DEPARTMENTAL OPERATIONS

WHEREAS, the Board approved Resolution Number R-374-03 establishing the Miami-Dade Resource Conservation Committee (RCC) to make recommendations on waste reduction, recycling, and environmentally preferable purchasing activities within County departmental operations; and

WHEREAS, the information contained in RCC reports is of importance to this Board of County Commissioners; and

WHEREAS, the attached RCC report entitled "Summary Report for Recycling and Environmentally Preferable Purchasing for the Period of April 1, 2003 – March 31, 2004" contains several recommendations and initiatives to help further the County's progress in these activities; and

WHEREAS, implementation of these recommendations will facilitate Miami-Dade County in meeting and exceeding the mandates of the Florida Solid Waste Act of 1988, Florida Statute 403.7065 relating to procurement of products or material with recycled content, and the Comprehensive Development Master Plan as it relates to reduction of solid waste and as it relates to establishment of products and/or materials created from recycled wastes; and

WHEREAS, the efforts of the RCC should be used to compare and evaluate the progress of the County in achieving certain goals and should develop long term goals for the implementation of resource conservation,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA, that this Board hereby directs the County Manager to implement the recommendations of the Miami-Dade County Resource Conservation Committee as provided in the report attached hereto and referenced above, and to provide a report to the Board of County Commissioners within 90 days detailing the actions taken as it relates to the implementation of these recommendations. In addition, the Manager is directed to direct the Procurement Department to actively seek environmentally preferable products and to consider developing a group of procurement specialists who should be assigned to seek out these environmentally preferable products and services.

The annual report of the RCC shall, in the future, contain a comparison with the 2003-2004 report and shall include long term goals (5-year) which provide for:

- 1. Increasing the percentage of County purchases of office goods containing recycled material and/or qualifying as an environmentally preferred product
- 2. Increasing the rate of participation in recycling by County agencies
- 3. Increasing the overall percentage of the County operational waste stream that is eliminated or diverted through recycling and conservation efforts, and
- 4. Reducing operational costs through environmentally preferable products, services and practices.

The annual reports of RCC shall be provided to each member of the Board and should be issued, if possible, to coincide with the annual celebration of Earth Day.

Agenda Item No. 11(A)(12) Page No. 3

MEMORANDUM

Substitute Agenda Item No. 7(D)(1)(A)

TO:

Honorable Chairperson and Members

Board of County Commissioners

DATE:

April 22, 2003

FROM:

Steve Shiver

County Manager

SUBJECT: Resolution Establishing A Policy for Miami-Dade County Favoring Waste Reduction, Environmentally-Based Promotional Activities

And the Purchasing of Commodities

Containing Recycled or Recyclable Content

This substitute item being submitted includes the addition of paragraph 2 in the Background Section to address additional information requested by Commissioner Sosa during the April 15th, 2003 Government Operations and Environment Committee Meeting.

RECOMMENDATION

It is recommended that the Board approve the attached resolution establishing a policy for Miami-Dade County favoring waste reduction, environmentally-based promotional activities and the purchasing of commodities containing recycled or recyclable content. This will also serve to reestablish the Recycling Management Committee under the Department of Environmental Resources Management with the new name, The Miami-Dade Resource Conservation Committee, and will further the Committee's original goals of promoting waste reduction and encouraging County procurement of recycled-content products and supplies.

BACKGROUND

The Recycling Management Committee was created in 1992 pursuant to Resolution No. R-214-92 (attached for reference), which also established "a procurement policy for Metropolitan Dade County favoring waste-reduction and implementing a program to purchase commodities containing recycled or recyclable content." This resolution was passed in order to facilitate meeting and exceeding the mandates of the Florida Solid Waste Act of 1988, which called for a 30% reduction in the solid waste stream by 1994, as well as Florida Statute 403.7065, which states in part "...any State agency or agency of a political subdivision of the State which is using State funds...is required to procure products or materials with recycled content when those products or materials are available at reasonable prices." The Committee was chaired by the Director of GSA Procurement Management or a designee, and was comprised of representatives from "departments most affected by the recycling program." The primary responsibility of the Committee has been to promote recycling to County Departments, facilitate Departments' recycling activities, and assist GSA Procurement Management in promoting the "use of waste-reducing products, recycled products and recyclable products."

Hon. Chairperson and Members Board of County Commissioners Page 2

Miami-Dade County employees and operations are the targets of the Committee activities since other existing DERM and DSWM programs target the general public. Revenues collected from the County's recycling contract, currently with American Paper Recycling Inc., fund the Committee's activities, such as promotion of recycling and waste reduction to departments, assistance to departments' in their recycling efforts, education of Committee members, and sponsorship of appropriate environmental activities and conferences. Therefore, there is no additional cost to the County for the Committee's activities. Currently, there is a net fund balance of approximately \$53,000.00, which has accrued over the last nine years, available for these efforts.

When the Department of Procurement Management separated from General Services Administration approximately three years ago, the Committee realized that it would be necessary to either sunset the Committee, reestablish the Committee under the new Department of Procurement Management, or reestablish the Committee under a different department. Since most departments already had established recycling programs the Committee decided to begin focusing more efforts on promoting the use of waste reducing, recycled, and recycled products, and determined that the Committee could facilitate these activities better under the purview of the Department of Environmental Resources Management (DERM). It is anticipated that by operating under DERM the Committee will also be able to assist Departments in other environmentally preferable activities and procurement by working with existing pollution prevention initiatives.

RESOLUTION NO. 374-03

RESOLUTION ESTABLISHING A POLICY FOR MIAMI-DADE COUNTY FAVORING WASTE-REDUCTION, ENVIRONMENTALLY-BASED PROMOTIONAL ACTIVITIES AND THE PURCHASING OF COMMODITIES CONTAINING RECYCLED OR RECYCLABLE CONTENT

WHEREAS, the STATE of FLORIDA enacted legislation in 1988 requiring "Any State agency or agency of a political subdivision of the State which is using State funds... is required to procure products or materials with recycled content when those products or materials are available at reasonable prices." Section 403.7065 of the Florida Statutes. The objective is to develop a policy and program that encourages waste minimization; and

WHEREAS, the UNITED STATES DEPARTMENT OF ENVIRONMENTAL PROTECTION AGENCY (EPA) has issued guidelines implementing Section 6002 of the Resource Conservation and Recovery Act of 1976 (RCRA) which Congress passed; and

WHEREAS, Miami-Dade County wishes to promote the use of waste-reducing, recycled and recyclable products in an effort to stimulate the demand for such products and to reduce the solid waste stream; and

WHEREAS, the Board of County Commissioners has found and determined that adopting a procurement policy and an affirmative procurement program requiring the use of such products will both reduce the amount of waste generated and will increase the overall demand for recycled and recyclable products; and

WHEREAS, the Board of County Commissioners has recognized that the development and implementation of a comprehensive recycling program will be a stimulus to County progress in the area of waste management and serve as a model for other public entities and private sector companies; and

WHEREAS, the Board of County Commissioners recognizes that implementation of this program will bring the County into conformance with Florida State Law, which includes requirements for the procurement of products or materials with recycled content by local governments according to the Solid Waste Management Act of 1988; and

WHEREAS, the Board of County Commissioners wishes to reaffirm its commitment to the County's "In-house Recycling Program" and establish similar programs for employee participation in addition to new and existing recycling markets,

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF COUNTY COMMISSIONERS OF MIAMI-DADE COUNTY, FLORIDA:

SECTION I - Definitions:

For purposes of this resolution, the following definitions apply:

a. Recovered Material - "Recovered Material" shall be defined as any waste

material or by-products that have been recovered or

diverted from solid waste.

b. Recycled Products - "Recycled Product" shall be defined as any product that is

in whole or in part composed of recovered materials.

c. Recyclable Product - "Recyclable Product" shall be defined as the ability of a

product and its packaging to be reused, reconditioned for

use, or recycled through existing recycling collection

programs.

d. Waste-Reducing Product - "Waste-Reducing Product" shall be defined as any product

which will result in less waste generated due to its use

rather than another product designed to serve the same

function with a greater waste generation rate. This shall

10 X

include, but not be limited to those products that can be reused, refilled or have a longer life expectancy and contain a lesser amount of toxic constituents.

e. Post-Consumer Material -

"Post Consumer Material" shall be defined as those products generated by business or consumer which have served their intended end uses, and which have been separated or diverted from the solid waste stream for the purposes of collection, recycling and disposition.

f. Practicable -

"Practicable" shall be defined as meaning "capable of being used" and meeting the following criteria: (1) performance in accordance with applicable specifications: (2) availability at a reasonable price: (3) availability within a reasonable period of time.

g. Environmentally Preferable

Products-

Products or services that have a lesser or reduced effect on human health and the environment when compared to competing products and services that serve the same purpose. This considers raw material acquisition, manufacturing, distribution, use, maintenance, and disposal of the product.

h. Departments -

"Departments" shall be defined as being under the direction of the Board of County Commissioners of Miami-Dade County, Florida; other County agencies and Constitutional Officers may voluntarily elect to follow these guidelines. i. End Use -

"End Use" shall be defined as an intended final use of a product by a consumer, which will not result in additional value being added to the product.

j. Procurement Contract -

"Procurement Contract" shall be defined as any contract that is awarded by the County for the purchase of tangible goods.

k. Minimum Content Standards - "Minimum Content Standards" shall be defined as standards set by the County specifying the minimum level of recovered material and/or post-consumer material necessary for designated products to qualify as recycled products.

<u>SECTION II</u> - Procurement and Waste Reduction Program

- a. The Director of the Department Of Environmental Resources Management (DERM) or designee shall serve as Chairperson of the Miami-Dade Resource Conservation Committee and will be responsible for developing administrative procedures to ensure that the Committee meets the goals outlined in this resolution.
- b. Department of Procurement Management shall review and revise product specifications and standard bid language to eliminate terms, requirements, or specifications prohibiting or discouraging the procurement of recycled or recyclable materials.
- c. Department of Procurement Management shall ensure specifications for the procurement of commodities and will include at a minimum the recycled content specifications developed by the U.S. Environmental Protection Agency (EPA)/State of Florida, where possible.

- d. Department of Procurement Management shall promote the use of waste-reducing products, recycled products and recyclable products by clearly designating and including information in publications and any other appropriate media, concerning the procurement program and the County's interest in soliciting vendors to participate in its program.
- e. The Department of Environmental Resources Management shall promote the use of waste-reducing products, recycled products and recyclable products by identifying these products, their sources and disseminating such product information to County departments and various municipalities.
- f. The Department of Environmental Resources Management shall endeavor to participate in committee activities, product shows, training sessions, seminars, meetings and symposiums sponsored by organizations advocating environmentally preferable products and services, waste-reducing products, recycled products and recyclable products.
- g. Department of Procurement Management shall review Federal and State Procurement requirements to determine what additional efforts, if any, are required to comply with the law pertaining to the purchase of recycled materials and products used by the County.
- h. Department of Procurement Management shall maintain the official listing of vendors capable of supplying the County with environmentally preferable products and services, waste-reducing products, recycled products, and recyclable products.
- i. Department of Procurement Management shall update and include pertinent factors in its Procurement Guidelines to encompass the responsibility and authority necessary to implement this resolution.
- j. Department of Procurement Management shall require vendors to provide certification stating estimated percentages of recycled material used in the manufacture of goods and commodities procured by the County, where applicable.
- k. Department of Procurement Management shall, in their bid specifications, require all vendors to submit reports to the County using both sides of paper sheets whenever practical.

<u>SECTION III</u> - Departmental Responsibilities

- a. Departments shall conduct business in a manner that supports the Comprehensive Development Master Plan, which states that the County shall promote the establishment and expansion of markets for products and materials created from recycled wastes through cooperative State and Federal efforts, County purchasing policies, and by encouraging the purchase of such products by County vendors, clients and citizens.
- b. Departments shall conduct business in a manner that supports the Comprehensive Development Master Plan which states that the County shall provide for the reduction of per capita production of solid waste by encouraging the use of waste reduction technologies and recyclable packaging materials.
- c. Departments shall not submit specifications or requisitions that specifically exclude the use of waste-reducing, recycled, or recyclable material, or other environmentally-preferable material.
- d. Departments shall ensure the participation of its employees in all in-house recycling programs.
- e. Departments are encouraged to provide information to Department of Procurement Management staff identifying available products with recycled-content and where the County can procure such products for use.
- f. Departments shall whenever practicable, participate in the testing of recycled-content and environmentally-preferable products, as identified by Department of Procurement Management or DERM for their compatibility with existing equipment or for a specific end use.
- g. Departments shall report the status of its recycling efforts and accomplishments to the Miami-Dade Resource Conservation Committee on an annual basis to include but not be limited to: any recycling collection data and waste-reduction data acquired as a result of participation in County recycling and/or waste-reduction programs.

h. Departments that generate revenue from the sale of recyclable materials shall recycle a percentage of said revenue into a fund for distribution by the County to worthwhile environmental projects. Recommendation for the correct percentage to be contributed, and selection of projects shall be made jointly between the Miami-Dade Resource Conservation Committee and the Environmental Advisory Task Force.

<u>SECTION IV</u> - Miami-Dade Resource Conservation Committee's Responsibilities

- a. The Miami-Dade Resource Conservation Committee, which shall be chaired by the Director of the Department of Environmental Resources Management or his designee, shall select Departments most affected by the recycling program and request that these Departments designate representatives to serve on the Committee.
- b. The Miami-Dade Resource Conservation Committee shall recommend modifications to ordinances, administrative orders, program goals and operating procedures, and develop recommended policy statements aimed at encouraging recycling, reduction, and material reuse, and environmentally-preferable practices by County employees on an as needed basis.
- c. The Miami-Dade Resource Conservation Committee shall identify new markets for "inhouse" collection, recycling, and environmentally preferable purchasing programs and assist Miami-Dade County Departments in promoting the participation of their employees by providing direction for the development and implementation of these programs, as well as recognizing Department accomplishments.
- d. The Miami-Dade Resource Conservation Committee shall prepare and submit to the County Manager, an annual report which summarizes the activities of all "in-house" recycling programs, as well as other environmentally-based promotional efforts, activities, sponsorships and accomplishments performed by the Committee during the previous year.

Amended Agenda Item No. 5(a

TO:

Honorable Mayor and Members,

DATE:

February 18, 1992

Board of County Commissioners

SUBJECT:

Waste-Reduction

1ancu Commissioner Harvey Ruvin, Chairman

Resolution

Environment and Land Use Committee

R#214-92

As Dade County seeks to meet and hopefully exceed the mandates of the Florida Solid Waste Act of 1988 (30% reduction in waste stream by 1994), every available reasonable strategy must be employed.

As you know, we can be quite proud of the continuing success and national leadership of our curb-side recycling program. Under the Commission's direction, we are now moving our recycling efforts into the commercial and hi-rise arenas.

As state after state mandates recycling by its local governments, the inevitability of market overload on the supply side of the equation is a growing concern.

CLEARLY - THE DEMAND. FOR RECYCLABLES AND FOR PRODUCTS MADE OF RECYCLED MATERIALS MUST BE ENHANCED - if America's efforts in this regard are to be ultimately successful.

This resolution will establish a County-wide procurement policy that will stimulate that demand as well as contribute to a reduction in prices for them. In addition, the County will work with vendors to help develop new and promote existing recycled products.

A draft of this proposed new policy is already being looked at by a special committee of the South Florida Regional Planning Council and we have the opportunity to have a real impact throughout Florida and the Nation by example.

I might add that our next step will involve a major emphasis on PRE-CYCLING - : A program of educating our residents regarding ways that they can reduce by "eco-smart" buying and planning.

Other legislation dealing with packaging reform still awaits the Legislature's removal of current preemptions which block local reform actions.

following criteria: (1) performance in
accordance with applicable
specifications; (2) availability at a
reasonable price; (3) availability within
a reasonable period of time.

g. Departments

- "Departments" shall be defined as being under the direction of the Board of County Commissioners of Metropolitan Dade ... County, Florida; other County agencies and

Constitutional Officers may voluntarily elect to follow these guidelines.

h. End Use

- "End Use" shall be defined as an intended final use of a product by a consumer which will not result in additional value being added to the product.
- i. Procurement Contract.
- "Procurement Contract" shall be defined
 as any contract which is awarded by the
 County for the purchase of tangible goods.
- j. Minimum Content Standards
- "Minimum Content Standards" shall be defined as standards set by the County specifying the minimum level of recovered material and/or post-consumer material necessary for designated products to qualify as recycled products.

SECTION II - Procurement Program

- a. The Director of GSA Procurement Management or designee shall serve as Chairperson of The Recycling Management Committee and will be responsible for developing administrative procedures to ensure that the committee meets the goals outlined in this resolution.
- b. GSA Procurement Management shall review and revise product specifications and standard bid language to eliminate requirements or specifications prohibiting or discouraging procurement of recycled or recyclable materials.
- c. GSA Procurement Management shall ensure specifications for the procurement of commodities will include at a minimum, the recycled

Amended Agenda Item No. 5(g)(2) Page No. 5

content specifications developed by the U.S. Environmental Protection Agency (EPA)/State of Florida, where possible.

- d. GSA Procurement Management shall promote the use of waste-reducing products, recycled products and recyclable products by advertising in publications and any other appropriate brochures, concerning the procurement program and the County's interest in soliciting vendors to participate in its program.
- e. GSA Procurement Management shall promote the use of waste-reducing products, recycled products and recyclable products by identifying these products, their sources and disseminating such product information to County departments and various municipalities.
- f. GSA Procurement Management shall endeavor to participate in committee activities, product shows, training sessions, seminars, meetings and symposiums sponsored by organizations advocating waste-reducing products, recycled products and recyclable products.
- g. GSA Procurement Management shall review Federal and State procurement requirements to determine what additional efforts, if any, are required to comply with the laws pertaining to the purchase of recycled materials and products used by the County.
- h. GSA Procurement Management shall maintain the official listing of vendors capable of supplying the County with waste-reducing products, recycled products and recyclable products.
- i. GSA Procurement Management shall update and include pertinent factors in its Administrative Order 3-2 to encompass the responsibility and authority necessary to implement and enforce this resolution.

- j. GSA Procurement Management shall require vendors to provide certification stating estimated percentages of recycled material used in the manufacture of goods and commodities procured by the County.
- k. GSA Procurement Management shall, in their bid specifications, require all vendors to submit reports to the County using both sides of paper sheets whenever practicable.
- 1. GSA Procurement Management shall transmit to vendors, upon their request, product and vendor lists prepared by Procurement.
- m. Cooperative Procurement Effort: Metropolitan Dade County, Dade County
 School Board and The Public Health Trust shall share various policies
 and procurement contracts to assure uniformity of products, goods and
 services which is necessary to achieve the mutual goal of waste
 minimization.

SECTION III - Departmental Responsibilities

- a. Departments shall not submit specifications or requisitions which specifically exclude the use of waste-reducing, recycled or recyclable material.
- b. Departments shall provide written justification to the Director of GSA procurement Management when the purchase of a recycled-content product is found impracticable or if the recycled-content product would significantly impact a department's adopted budget.
- c. Departments shall ensure the participation of its employees in all in-house recycling programs and develop incentive programs to accomplish the goals set forth by the Recycling Management Committee.

Amended Agenda Item No. 5(g)(2) Page No. 7

- d. Departments shall provide information to GSA Procurement Management staff identifying available products with recycled-content and vendors where such products can be procured for use by the County.
- e. Departments shall, wherever practicable, participate in the testing of recycled-content products, as identified by GSA Procurement Management for their compatibility with existing equipment or for a specific end use.
- f. Departments shall report the status of its recycling efforts and accomplishments to the Recycling Management Committee on a quarterly basis, to include but not be limited to: data compiled on recovered material content, comparative price information, availability of products, product performance, competition, consumption, collection and waste-reduction data, sale of used materials and incentive programs.
- g. Departments that generate revenue from the sale of recyclable materials shall recycle a percentage of said revenue into a fund for distribution by the County to worthwhile environmental projects. Recommendation for the correct percentage to be contributed, and selection of projects shall be made jointly between the Recycling Management Committee and The Environmental Advisory Task Force.

SECTION IV - Recycling Management Committee's Responsibilities

Director of Procurement or designee, shall select representatives from the departments most affected by the recycling program to serve on the committee.

- b. The Recycling Management Committee shall recommend modifications to ordinances, administrative orders, program goals and operating procedures on an as needed basis.
- c. The Recycling Management Committee shall identify new markets for "in-house" collection and recycling programs and provide direction for the development and implementation of these programs.
- d. The Recycling Management Committee shall prepare and submit to the County Manager, an annual report which summarizes the activities of all "in-house" recycling programs. This report shall include, but not be limited to:
 - -Quantities of designated products purchased by departments;
 - -Quantities and types of recycled products purchased;
 - -Prices and relative quantities purchased of recycled and non-recycled designated products;
 - -A determination as to whether minimum content standards should be changed or remain the same;
 - -A summary of program promotional efforts;
 - -An assessment of the effectiveness of the procurement program and an evaluation of program goals;
 - -Recommendations for changes in procurement policy, including designation of additional products; and
 - -Recommendations for changes to the South Florida Building Code in conhection with construction materials and types of construction, after consultation with the Board of Rules and Appeals or its designee.

MEMORANDUM

TO:

Honorable Katy Sorenson, Vice Chair

Board of County Commissioners

DATE:

August 3, 2004

FROM:

George M. Burgess

County Manager

SUBJECT: Request for Information Regarding

Purchase of Recycled/Environmentally

Friendly Products

The Summary Report provides a snap shot of information collected for each of the requested categories: Recycling, Recycled Content Purchasing, and Environmentally Preferable Purchasing. Each of these categories themselves has a more detailed summary report that is attached as an addendum behind the overall Summary Report. As is mentioned in this Report, the figures presented are the best available approximations due to the fact that departments do not traditionally track this information and this is the first time it has been requested. The information requested from departments for this report will now be requested on an annual basis, and the data in this report will serve as the baseline upon which future results will be compared.

Please advise if you require any additional information at this time.

Pedro G. Hernandez, P.E., Assistant County Manager cc: Corinne Brody, Special Assistant, Strategic Management Initiatives Alex Muñoz, Assistant County Manager Susanne Torriente, Assistant County Manager John Renfrow, Director, DERM

Theodore G. Lucas, Director, DPM

Summary Report for Recycling and Environmentally Preferable Purchasing For the Period of April 1, 2003 – March 31, 2004

The information contained in this Summary Report is being provided in response to the information requested in the March 10, 2004 Memorandum from Commissioner Sorenson, concerning the County's recycling and Environmentally Preferable Purchasing (EPP) activities. In an effort to gather data in a more consistent format, and to facilitate more accurate reporting now and in the future, DERM staff developed reporting forms with specific instructions, along with a database to allow processing of the data into various reporting categories. A "Reporting" package was created and distributed by the County Manager's Office to all County departments, instructing them to electronically provide to DERM the information requested in the Memorandum. The information submitted by the departments has been entered into the database and results have been tabulated for various aspects of these activities. This information will now be requested from departments on an annual basis, with the reporting cycle coinciding with Earthday, April 22nd, since that is the day Resolution #374-04 was passed.

It is important to note that most of these numbers are approximations, rather than exact amounts, and in most cases are probably lower than the actual figures. Factors contributing to this include the following:

- This is the first time this information is being requested and departments have not historically tracked these measures and activities, resulting in incomplete information from some departments. DERM will work with individual departments during the next reporting cycle, to refine the reporting structures.
- The past several contracts for mixed paper recycling were problematic. There were several interruptions in service over the past 3 years due to contractor business closings during term of contract, as well as a lack of submittal of reports from the contractor.

This Summary provides some of the more significant figures obtained from information submitted by County departments for their recycling and purchasing initiatives during the requested period of April 1, 2003 to March 31, 2004. The complete Summary Reports containing more detailed information are attached as an addendum.

RECYCLING

Recycling is a way to divert wastes from final disposal by reprocessing them to remove and utilize valuable components as a feedstock or raw material in the manufacturing of new products. There are numerous items recycled by County departments, from paper products, to carpet, to fleet maintenance materials. The table below provides information about those items that are recycled in relatively large volume during the reporting period. As shown, in some instances revenue is generated and in some instances there are costs incurred. For the subset of items listed below, there is a net gain of approximately \$175,000.00. Overall, the County saved approximately \$108,000.00 through its entire recycling activities (see the attached full report for more details and a comprehensive listing).

Recycled Item.	Quantity	" Units	Revenue (+) or Cost (-) **					
Batteries (Alkaline &								
Rechargeable)	21,150	lbs.	-\$ 14,735.79					
Vehicle Batteries	1,497	batteries	+\$ 17,186.58					
Carpet	105,137	lbs.	-\$ 26,284.25					
Fluorescent Lamps	42,134	bulbs	-\$ 22,176.50					
Fuel	554,368	gallons	+\$ 203,348.00					
Paper (white office)	>770,838	lbs.	-\$ 7,448.36					
Scrap Metal	819,875	lbs.	+\$ 10,935.00					
Used Oil	106,266	gallons	+\$ 13,996.63					
	Total For Items In Chart +\$ 174,821.31							

In the chart above, "Revenue," with a (+) in front of the number, indicates that the County was paid to recycle this item and "Cost," with a (-) in front of the number, signifies that the County paid to have that item recycled

It is important to note a few issues here:

- Not all departments provided information for costs/revenues to correspond to the volumes of recycled items reported; therefore these costs/revenues may be understated, both in the chart above and in the overall report.
- The volume of white office paper recycled over the past year since Resolution 374-03 was passed has been estimated from data supplied from March to May, 2004, by the current recycling contractor, Eco Paper Recycling Corporation. It is anticipated that these figures will increase over the next year as the Resource Conservation Committee promotes paper recycling to County employees and departments, and as long as the current contractor continues to provide good service.
- Disposal and recycling of electronics, particularly components associated with computer systems, is quickly becoming an important and problematic issue nationwide. Although several departments indicated transference of these items to the County Store for final disposition, this issue should be investigated further.

RECYCLED-CONTENT PURCHASES

Products that are designated as containing "recycled content" are those items that are partially or wholly manufactured from a material that has been collected from a waste product and reprocessed to serve as a "raw" material in the finished product. The County spent approximately \$2,000,000.00 on the purchase of recycled-content products. Of these overall purchases, approximately \$1,050,000.00 was spent on recycled-content items available through the GSA Supply Catalogue. There are over 100 items listed in the Catalogue that are made of recycled content materials. During this reporting period, overall expenditures on GSA supplies from the Catalogue totaled \$7,113,538.50. Therefore, the recycled-content purchases comprised

approximately 15% of the overall GSA Catalogue purchases. Most of the items listed in the chart below are office supplies available in the Catalogue.

Item	: Quantity	» Units i:	Exp	iènditures 🦠		
Calendar Books/Planners	9,589	Items	\$	39,392.80		
Storage Boxes	8,040	Items	\$	102,912.00		
Carpet	10,000	Sq. Yds.	\$	241,787.00		
Clipboards	2,737	Items	\$	7,428.35		
Monthly Planner Desk Pads	15,269	Items	\$	14,505.55		
File Folders	10,781	Boxes	\$	63,937.20		
Classification & Budget Folders	4,612	Boxes	\$_	106,122.25		
Recycled-content Paper	18,211	Cases	\$	623,567.27		
Expanding Pocket Files	28,181	Items	\$	17,568.25		
Paper Towels	8,719	Cases	\$	99,655.03		
Toilet Paper	8,408	Cases	\$	230,272.45		
Т	Total for Items in Chart					

It is important to note a few issues here:

- The GSA catalogue is currently the standard source for the purchase of office supplies and therefore is the primary means of informing County staff of items available with recycled content. The most current edition available is the 1999 2001 catalogue.
- There is no direct equivalent recycled-content paper available for the virgin 8.5 X 11 in., 24 lb. Laser paper (Item P-1531). The closest comparable paper is the 30% post-consumer recycled content, 8.5 x 11 in., 20 lb. photocopier (general purpose) paper. It is approximately \$10.00 cheaper per case than the virgin paper, but is also a lighter weight, and therefore may not be a suitable substitute in all instances.
- The virgin 8.5 x 11 in., 20 lb. photocopier paper is approximately \$2.00 per case cheaper than the equivalent (8.5 x 11 in., 20 lb.) 30% post-consumer recycled-content copier paper, which may be a disincentive for purchasing it. This cost difference may, in part, be due to purchasing volumes.
- The total expenditures in paper (virgin & recycled-content) reported during this period were \$2,065,956.00. Therefore, the recycled-content paper purchases comprised approximately 30% of this overall purchase. These figures include paper used by GSA at the print shop and copy center, as well as paper used at the Data Center located within the Emergency Operations Center, where numerous large reports are printed out on a daily basis.

ENVIRONMENTALLY PREFERABLE PURCHASING (EPP)

Environmentally Preferable Purchasing, or EPP, is described as "the purchase of products or services that have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose." The information provided for this category does not lend itself as well to database tabulation. Therefore, the table below provides brief descriptions. From the information provided by departments, it is estimated that the County saved over \$2,200,000.00 through EPP initiatives.

Initiative	Dept.	, Annual \$ Savings.	Environmental Benefit
The required Annual Bond Holders Book Report is distributed on CD rather than hard copy, as previously done.	Finance	\$ 16,000.00	Reduced paper usage for this report by 50% and reduces pollutants associated with paper production.
Transitioned from traditional film cameras to digital cameras	DERM	\$ 42,000.00	Resources conserved and pollution prevented from production and developing of film.
Heavy-duty tires are recapped up to 3 times, prior to final disposal.	GSA	\$1,141,552.00	Reduced energy and natural resource (oil) usage by recapping old tires instead of manufacturing new tires. Also saves landfill space.
PuraDYNE oil filters installed on most heavy duty equipment	GSA	\$ 18,480.00	Oil consumption reduced by 50% and oil filters usage reduced by 66%
Waste water treatment plants recover 29,376,000 KW/Yr of Methane gas generated from the wastewater treatment process for use as a fuel on-site	WASD	\$1,013,472.00	Makes use of a waste product, methane, that is a "Global Warming Gas", and avoids pollution produced from other sources of energy such as electricity.
Total Savings for These Is	nitiatives	\$2,231,504.00	

The table above highlights those EPP initiatives that have provided the County with a significant cost savings, as well as the environmental benefits associated with them. There are other EPP initiatives implemented that may not necessarily save money, but provide other significant benefits in addition to the environmental benefits. For example, each year DERM purchases recycled plastic content T-shirts for its Baynanza Bay Clean-up Day. One of primary benefits in addition to the environmental benefits is that the T-shirts serve as an educational tool, to help teach the public participants at the event about the importance of recycling and buying recycled. Another initiative that was implemented several years ago was to include criteria in janitorial cleaning contracts supporting the use of safer, less toxic cleaning chemicals. This not only benefits the environment, but also promotes healthier and safer buildings, benefiting both the cleaning staff, as well as the County employees and public entering these buildings.

It is believed that there are additional EPP initiatives currently being implemented, but since many individuals do not fully understand the concept of Environmentally Preferable Purchasing, they do not realize that they are implementing these types of projects. DERM staff and the Miami-Dade Resource Conservation Committee intend to follow up with departments to better educate them on the concept, and help departments better identify those projects that fall under this category.

THE MIAMI-DADE RESOURCE CONSERVATION COMMITTEE

As per Resolution #374-03, the Miami-Dade Resource Conservation Committee is tasked with several responsibilities associated with the promotion and implementation of waste reduction, recycling and Environmentally Preferable Purchasing activities. Unfortunately, during the past year, the Committee fell short of several of its goals for these initiatives because of the problems encountered with the paper recycling contracts. The majority of Committee time was spent on the administrative tasks associated with vendor non-performance and the creation and implementation of a new bid for paper recycling services. As a result, there was very little promotion or progress with these initiatives. DERM and Committee representatives will work with GSA and the Department of Procurement Management to determine other alternatives for handling these administrative tasks and resolve this issue.

SUMMARY & RECOMMENDATIONS

This project has provided an excellent learning experience for all involved. It has made all of the departments more aware of their activities and progress in waste reduction, recycling, and Environmentally Preferable Purchasing. It has brought these initiatives to the forefront, which can help provide the impetus for making further progress in these areas, and has provided a rough baseline upon which to measure future success. It has also helped identify some problem areas in reporting and implementation that can now be addressed, as well as additional opportunities that can be pursued by County departments.

Based on the experience and information gathered during this project, DERM staff will continue to work with the Miami-Dade Resource Conservation Committee to further the County's progress in its waste reduction, recycling, and Environmentally Preferable Purchasing goals. Some of the initiatives to achieve this goal include:

- 1) Ensure that there is an equivalent recycled-content paper available for the virgin 8.5 x 11 in., 24 lb. Laser paper. Although the recycled-content 8.5 x 11 in., 20 lb. photocopier paper can be utilized in most applications where the virgin 24 lb. Paper is used, this would facilitate a higher usage of the recycled-content paper.
- 2) Require all departments to purchase recycled-content paper for all standard office uses, allowing for exceptions when virgin paper must be utilized for special reasons. Because of the volume of paper purchased by Miami-Dade County, this should facilitate reduced prices for recycled-content paper.

- 3) Have the appropriate department(s) conduct a systematic review and verification of all items available in the GSA catalogue (and on-line listing) that contain recycled-content materials, to determine which items truly are available in recycled content. Once this has been determined, identify theses items more clearly and promote them as the preferred choice. If possible, also establish a system to insure that when recycled-content items are specified, that is what is shipped to the department.
- 4) Assign the administrative duties of service and contract management for the recycling services to the appropriate department(s) and/or individuals, allowing the Committee more time to identify and promote additional waste reduction, recycling, and EPP opportunities.
- 5) Establish a formal policy for County departments to transition to digital cameras from traditional film cameras.
- 6) Establish a formal policy for County departments to properly handle, recycle, and dispose of electronic equipment. This will help the County proactively address anticipated future restrictions on disposal of these wastes into landfills, and help prevent the County from incurring liabilities associated with improper disposal of these wastes.

The Resource Conservation Committee will also be identifying additional opportunities and recommendations in the coming year.

Replacement of Styrofoam with Paper Dining Products

"Summery Of Other covering a construction of the construction

Department: CED Prior (avoided) Costs: \$45.25

<u>Contact:</u> J. Rony Trofort, Buyer <u>Current Costs:</u> \$38.00

Annual Savings: \$7.25

Description:

We substitute styrofoam cups and plates with paper products.

Environmental Benefits:

Decrease in toxic materials used

Barriers to Implementaion:

According to employees, when items are used in microwave, the wax-type coating is perceived to be melting. No problem with the plates

Recommendations:

UT

Recycled Content T-Shirts

Department: DERM

Prior (avoided) Costs: \$25,937.00

Contact: Susannah Troner; OSEE; (305) 372-6784

<u>Current Costs:</u> \$31,067.50

Annual Savings:

(\$5,130.50)

Description:

As part of the promotional effort for its annual event "Baynanza", DERM provides participants that clean along the shorelines on Biscayne Bay Clean-up Day with t-shirts. These t-shirts are manufactured from 50% recycled polyester and 50% recycled cotton. Although there is an added cost, it is felt that it is important to demonstrate a commitment to the conservation of natural resources, particularly at an event of this kind.

This year 8,350 t-shirts were purchased (8,000 short sleeve various sizes; 350 long sleeve). The cost differential is approximately 20% or about \$0.62 per shirt.

Environmental Benefits:

Conservation of natural resources. Encouragement of market for recycled materials.

Barriers to Implementation:

Additional cost.

Some of Obertanic and all Provided Replacement of Film with Digital Cameras

Department: DERM Prior (avoided) Costs: \$44,000.00

Environment & Education; 305-372-6784; Annual Savings: \$42,000.00

: Reserve Pereir : 4:120

Description:

DERM has implemented an informal program to replace its traditional film cameras with digital cameras. Cameras are utilized by many of staff members in the performance of their regular duties, including a variety of field inspection responsibilities. From a baseline year of 1999, expenses for film purchasing and development have been reduced from approximately \$44,000 per year to less than \$2,000 per year. This represents a savings of over 95%.

As technology has advanced, the payback period for the higher initial purchase price of the digital cameras has been dramatically reduced. In the year 2000, for cameras utilized for 1-2 rolls of 12-24 exposure film, the payback period was 1 to 1.5 years, based on a digital camera price of ~ \$500. As superior digital cameras are now available (2004) for approximately half the price (\$250-\$300), the payback period is now less than a year.

There are also additional benefits incurred as the Department transitions to an EDMS system. Capturing images electronically helps to reduce the time and cost associated with digitizing (scanning) images.

Environmental Benefits:

The environmental benefits include resource conservation in the form of the elimination of film production as well as the elimination of chemicals necessary for film development.

Barriers to Implementaion:

1. 1986, 189

A suitable IT infrastructure is required to facilitate the download of images from the camera to a computer workstation. The images can then be permanently stored electronically and printed as needed.

Recommendations:

In all Departments where a suitable IT infrastructure exists to make use of digital camera technology, an aggressive conversion program should be implemented.

Hurricane Brochures

Department: DSWM Prior (avoided) Costs: \$0.00

Contact: \$0.00

Annual Savings: \$0.00

Description:

There were no purchases for brochures for the year in question however, when purchases are made the vendor GSA utilizes recycled paper when processing

Environmental Benefits:

Barriers to Implementaion:

Recommendations:

ADAMS DENS

Recycled Content Promotional Materials Department: DSWM Contact: Current Costs: \$0.00 Annual Savings: \$0.00

Description:

The Dept. orders items such as pencil, crayons, Coloring books, e.t.c made of recyclable material, however for the year in question no purchases were made for such items. When purchases are made the vendor is chosen from an approved County listing from the Procurement Division.

Environmental Benefits:

Barriers to Implementaion:

Electronic Data Management System (EDMS)

sumble of Obstantion in the Policies of the Constitution

Department: ERD Prior (avoided) Costs: \$0.00

Contact: Ron Williamson, ERD Admin. Ops. Manager Current Costs: \$0.00

375-1388 (office) 375-2459 (fax) Annual Savings: \$0.00

Description:

For the past several years, ERD has been seeking ways to reengineer its business processes and utilize technology to deliver services in the most efficient cost effective and customer friendly manner possible and eliminate the use of paper to the greatest extent possible. There are several components to the EDMS technology:

Imaging - New paperwork for employee personnel files is currently being scanned, imaged and available for viewing on line (via web browser) and greatly limit the creation of hard (paper) copies.

Computer Output to Laser Disc (COLD) - All computer generated Personnel Change Documents will be automatically sent to the electronic Personnel Folder of each employee. We estimate there are approximately 50,000 of these documents produced each year. There are many other system generated paper forms that could be eliminated using this technology resulting in an approximate savings of an additional 60,000 documents for a total of over 100,000 documents annually.

Backfiling - This effort is scheduled to include backfiling all existing paperwork in The Personnel File Room which will convert over 5,000,000 documents into electronic format. Once complete, employee files will be available for viewing throughout the County, this information, currently vulnerable to damage or destruction (with no duplicate copies) by natural disaster or vandalism will be protected, and file room space throughout the County will be available for other uses.

On Line Forms

We are currently in development of an on-line PCD to replace the manually hand processed PCDs done today. This form will have an electronic work flow which will insure a proper routing and will automatically go to the employee's personnel folder again creating a significant savings in staff time.

Time Collection is a project in an embryonic stage but if implemented, will replace our paper time sheet (PAR) with electronic time capture. This will allow for a much greater accountability for time capture on the front end of the payroll process in addition to saving over 172,000 paper PAR forms annually.

Environmental Benefits:

Elimination of over 250,000 paper documents annually

Barriers to Implementation:

Auto Tag Records Reduction & Recycling

Department: FIN Prior (avoided) Costs: \$0.00

<u>Contact:</u> Peter Cam (305) 375-4232 <u>Current Costs:</u> (\$57.20)

Annual Savings: \$57.20

Description:

The Auto Tag Branch Agency Office of the Tax Collector's Division receives copies of all customer transaction receipts from the twenty-five private Auto Tag agencies located around Miami-Dade County. When transaction audit processes conducted by Branch Agency Account Clerks are complete, the receipts are no longer required to be kept as records. A company called Simco Recycling Corporation collects the paper receipts for recycling. Revenue of \$57.20 is returned to the Auto Tag Index Code and the storage space required for records is reduced.

Environmental Benefits:

Paper is recycled, not wasted.

Barriers to Implementaion:

Cash Management Division Reports

द्वीयामाञ्चरकारियामः वेन राज्यामाञ्चासीर विचानसम्बद्धिः ।

Department: FIN Prior (avoided) Costs: \$1,800.00

<u>Contact:</u> Gisela Guth (305)-375-5134 <u>Current Costs:</u> \$900.00

Annual Savings: \$900.00

Description:

Cash Management tries to email and post reports on the Division website instead of printing hard copies for circulation. These reports when viewed by the Division are not printed but viewed online. When "On Demand" becomes available, two daily reports will be put on that system instead of a daily hard copy. The intention for later this year is to email the monthly Cash Management Portfolio to various departments instead of sending hard copies by inter-office mail. It is projected that this will save \$900 /yr by 2005 when it will be fully implemented.

Environmental Benefits:

Paper usage and the associated environmental impacts have been reduced by 50%.

Barriers to Implementation:

Recommendations:

CD Distribution of Bondholders Book

Department: FIN Prior (avoided) Costs: \$32,000.00

<u>Contact:</u> Peter Cam (305) 375-4232 <u>Current Costs:</u> \$16,000.00

Annual Savings: \$16,000.00

Description:

The Bondholders Book is an annual report to bondholders required on all bonds issued after Sept 15 1995, that updates all operating statistical data of those outstanding bonds according to Securities and Exchange Commisions rule 15 c2-12. The amount of paper used to produce this report has been reduced by 50% by utilizing an electronic format, Compact Discs (CD), for distribution.

Environmental Benefits:

Paper usage and the associated environmental impacts have been reduced by 50%.

Barriers to Implementaion:

Recommendations:

This process should be continued in the future and extended to 80% of all major reports produced. The Finance Department is researching into many areas to drastically reduce the volume of paper that we produce and circulate within the Department.

CD Distribution of Comprehensive Annual Financial Report

sporter, of the leading operation advisor because it

Department: FIN Prior (avoided) Costs: \$20,000.00

<u>Contact:</u> Peter Cam (305) 375-4232 <u>Current Costs:</u> \$10,000.00

Annual Savings: \$10,000.00

Description:

The Comprehensive Annual Financial Report summarizes the County's Finances, pursuant to State law. The amount of paper used to produce this report has been reduced by 50% by utilizing an electronic format, Compact Discs (CD), for distribution.

Environmental Benefits:

Paper usage and the associated environmental impacts have been reduced by 50%.

Barriers to Implementaion:

Recommendations:

This process should be continued in the future and extended to 80% of all major reports produced. The Finance Department is researching into many areas to drastically reduce the volume of paper that we produce and circulate within the Department.

\$1,805 WE'R

Environmentally Preferable Custodial Cleaning Chemicals

and the source of the source o

Department: GSA Prior (avoided) Costs: \$0.00

Contact: Nichole Hefty; DERM; (305) 372-6784 Current Costs: \$0.00

Annual Savings: \$0.00

Description:

Working in cooperation GSA, DERM, and DPM have developed "boiler-plate" language for use in contracts for custodial supplies and/or services. Custodial chemicals often can contain toxic constitutents and can be an issue of concern for storage, usage by custodial staff, and employees and the public that may occupy spaces that have been cleaned utilizing these chemicals. The contract language specifies certain criteria for physical properties, chemical constituents, and hazard ratings that must be met. Currently DERM has reviewed several Material Safety Data Sheets and worked with the custodial service provider for the Stephen P Clark Center to lower the toxicity of cleaners used on site.

This language has been utilized in several (~7) subsequent contracts that are pending review for verification. There are currently national standards that are being reviewed as a replacement for the locally drafted contract language. In addition, education for all involved is an important aspect of this program that will be pursued in the future.

There is no information available on cost savings as this is simply one requirement of a larger service contract with many variables.

Environmental Benefits:

Less toxic chemicals are stored and used, thereby lowering the risks for custodial staff, and employees and the public.

Barriers to Implementation:

Training is necessary for successful adoption, especially for custodial staff.

Recommendations:

Continue to include this language in custodial service contracts. Review and implement national standards as appropriate. Provide resources for training.

Retreading of Heavy Duty Tires

Sumida aloug laving markly language.

Department: GSA

Prior (avoided) Costs: \$1,668,436.00

Contact: Olga Diaz, Acting Director

Current Costs: \$526,784.00
Annual Savings: \$1,141,652.00

Description:

Heavy duty tires are recapped at least three times. When they are no longer serviceable they are sold to Pelar for \$1.00 each.

Recap tire savings \$1,160,000 (5800 tires recapped during study period). [UPDATE: 7,176 tires recapped at a cost of \$526,784; cost savings vs new tires of \$1,141,652]

11,470 non-resuable tires disposed of by contractor (Herrera tire - tires sent to landfill in Port St. Lucie)

Reuse of County tire casings saves \$89,051 (plus savings of using recapped tires)

Retreading (recapping) is the process whereby selected and inspected worn tires, called casings, receive a new tread. The worn tread is buffed away, and a new tread is bonded to the tire body in a process very similar to the manufacture of a new tire.

Environmental Benefits:

Energy use savings in new tire production vs recapping. Tire disposal in environmentally beneficial manner.

(Tires are basically petrochemical products. It takes 22 gallons of oil to manufacture one new truck tire. Since most of that oil is found in the tire casing which is reused in the retreading process, only 7 gallons of oil are needed to retread that same tire. A fleet using as few as 100 tires a year can save 1500 gallons of oil annually, while substantially reducing the number of casings that end up in the landfills. Ref: www.retread.org)

Barriers to Implementaion:

Use of Bypass Oil Filter System in Heavy Equipment

Subject (#Oherlandendenden Teinkhie Tueresin

Department: GSA Prior (avoided) Costs: \$0.00

Contact: Olga Diaz, Acting Director Current Costs: \$0.00

Annual Savings: \$18,480.00

Description:

The puraDYN oil filtration system has been installed on most heavy equipment.

According to the manufacturer, the puraDYN Bypass Oil Filtration System continuously cleans the lubricating oil by removing 100% of solid contaminants, as well as removing liquid contaminants. puraDYN systems are designed to work in conjunction with the full-flow filter, removing the smaller solid contaminants as well as water and fuel.

Oil consumption has been reduced by 50% and the use of regular filters by 66%. Waste oil is picked up by Perma-Fix and we get paid \$0.15 per gallon collected. Puradyne filters and other waste oil filters are picked up in 55-gallon drums by EMC at a cost of \$150.00 per drum. (Oil spill socks and contaminated Quick Dry are picked up in 55-gallon drums by Cliff Berry at a cost of \$150.00 per drum.)

Oil savings \$18,480; Filter savings ?;

Environmental Benefits:

Oil consumption has been reduced by 50% and the use of regular filters by 66%.

Waste oil recycled for other industrial uses.

Filters, oil spill socks, and contaminated quick dry disposed of in environmentally secure process.

Barriers to Implementaion:

Replacement of Styrofoam with Paper Dining Products

Department: MDAD Prior (avoided) Costs: \$4,200.00

<u>Contact:</u> James Decesare (305)876-7206 <u>Current Costs:</u> \$12,100.00

Annual Savings: (\$7,900.00)

Description:

The Department replaced the use of styrofoam cups and plates with paper cups and plates.

Environmental Benefits:

Styrofoam products are not biodegradable, when discarded it clogs landfills for centuries, where it takes up more space than paper. Once in the environment, Styrofoam quickly crumbles into particles that persist indefinity on land and in waterways where it is readily available to wildlife, posing deadly threats to animal digestive and pulmonary systems. Its environmental threats are compounded if it finds its way to a municipal incinerator where it is reduced to airborne toxic chemicals that cannot be fully trapped by pollution control devices and may filter toxicity into food.

Barriers to Implementaion:

Increased expense.

Recommendations:

The most obvious solution is to use paper products

Landfill Gas Purchase

Somether Othe Favor medally Reflects Euritelic

Department: WASD Prior (avoided) Costs:

Contact: \$0.00

<u>Annual Savings:</u> \$190,000.00

\$0.00

i akoninime emisti i 4,678008+

Description:

An MOU has been signed under which the WASD South District Wastewater Treatment Plant will acquire and utilize a continuous supply of at least 350 CFM of landfill gas from the DSWM South Dade Landfill. WASD has agreed to pay DSWM 35% of the net quarterly savings (avoided energy costs, etc.) after recovery of initial design and construction expenditures.

Preliminary estimates are that energy savings may total over \$190,000 per year, providing a payback period of about 3 years. Actual fiscal performance will vary with fluctuating traditional source energy costs.

The time to complete construction is estimated as approximately 2 years.

Environmental Benefits:

Landfill gas is recovered for reuse avoiding detrimental environmental impacts due to venting or flaring.

The utilization of resources from "traditional" energy sources are avoided, along with the associated harvesting, refinement/conversion, and distribution impacts.

Barriers to Implementaion:

This project is the result of several years of discussion and study.

Recommendations:

The volume of landfill gas utilized may be increased depending on reliable availability and demand.

Wastewater Methane Gas Recovery and Use

Department: WASD Prior (avoided) Costs: \$1,013,472.00

Contact: Surrent Costs: \$0.00

Annual Savings: \$1,013,472.00

Description:

WASD Waste Water Treatment Plants recovered approximately 29,376,000 KW / Yr worth of methane gas generated by waste treatment process. This gas has an approximate value of \$1,013,472.00. The gas is used as fuel for engines in operation.

Environmental Benefits:

Avoids the production and use of another source of fuel. Methane gas is a global warming gas.

Barriers to Implementaion:
